PNNL ‘Science as Art’ Exhibit Comes to Tri-Cities Airport

Pasco, WA – The Port of Pasco is pleased to announce that the popular Pacific Northwest National Laboratory (PNNL) Science as Art Exhibit is on display at the Tri-Cities Airport (PSC) through 2018. The exhibition highlights the extraordinary images created during the scientific research that occurs at the PNNL in Richland, Washington.

Hundreds of graphic images are captured at the PNNL research facilities, extraordinary images that illustrate the work PNNL does to contribute to the safety, security and prosperity of our nation. The images represent the inspirational expressions of the creative skill and imagination of staff depicted in beautiful works of art. The brilliant images range from technology used to develop remote sensing techniques that conduct rapid damage assessments to helping enhance biological threat detection strategies.

For the next 12 months, people can enjoy many framed canvas prints, each featuring a stunning science image accompanied by a detailed story behind the science of the art.

Science as Art panels on display at the Tri-Cities Airport

“We are excited that PNNL has chosen to display these amazing images at the Tri-Cities Airport,” stated Buck Taft, Airport Director. “Art was a central focus in the planning and design of our airport, and we are pleased to be able to showcase such an extraordinary exhibit that highlights science and engineering in our community.”
